

# PHOEBE & PHOEBE MINI

Precision Engineered Integrated LED Coping Luminaires

Phoebe and Phoebe Mini, Illumicare's integrated LED coping luminaires, are offered in two radiant finishes - marine-grade, 316 stainless steel or heavy gauge copper. These precision engineered luminaires provide a wide, soft, glare-free ambient lighting for hardscape elements in your outdoor living spaces.

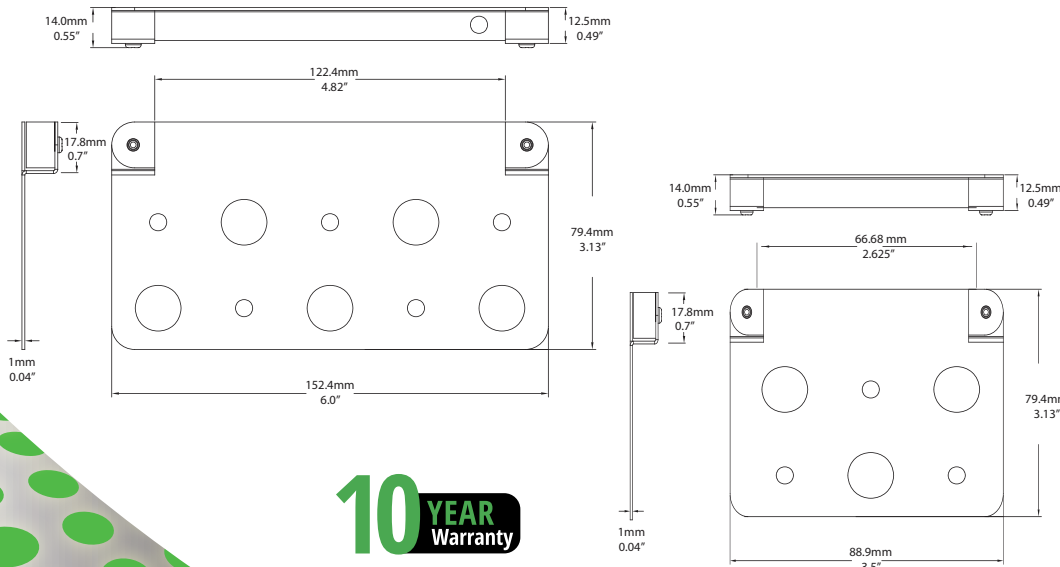

When designing the perfect hardscape oasis, Phoebe and Phoebe Mini offer wide, even lighting that creates ambiance, yet provides enough illumination for safe passage through the landscape. By clearly marking stairs, railings, edges, and retaining walls, Phoebe and Phoebe Mini are perfect for illuminating hardscapes and structures with casual, safety lighting.

The integrated Samsung LED chips are powered by the same proprietary driver as our flagship MR16 lamps.

Phoebe and Phoebe Mini's flat tempered glass offers just enough light to create a private, comfortable atmosphere for an outdoor patio, built-in spa, or outdoor kitchen, turning your landscape into the perfect place to relax or entertain.

## Luminaire Mounting

Phoebe and Phoebe Mini are mounted horizontally between surfaces using the flat stainless steel mounting bracket. The bracket can be inserted in existing structures or added to newly poured hardscape compounds. The luminaires can be unfastened from the mounting bracket by the two set-screws for easy maintenance or replacement.

**10 YEAR**  
Warranty
