

Solid Brass Deck / Niche Fixture

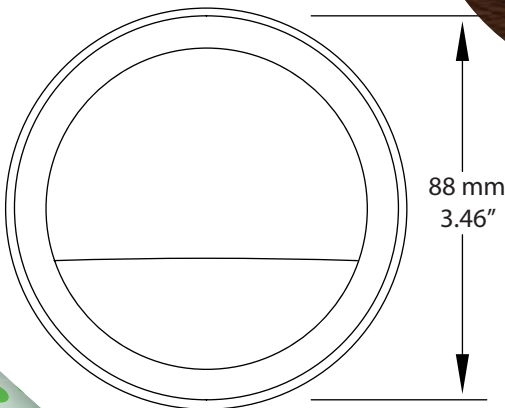

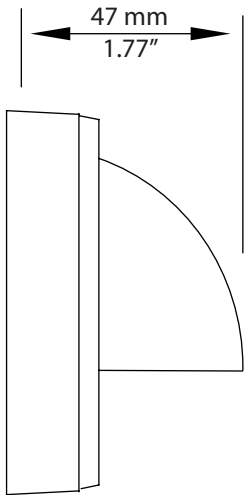

For more subtle, soft deck lighting, Opal, our shielded deck light, gives you just the right amount of light to highlight your outdoor entertainment areas.

Opal is the ideal niche light when adding interesting and artistic lighting in areas that require subtle, soft illumination. Installed on posts, beneath benches, against stair risers or as surface lights on vertical posts and below railings, Opal will help guests navigate paths, stairs, and other potential obstacles safely.

For smaller patio areas, where you need to hide the light source to avoid bright hot spots, Opal can be tucked into small nooks, edges and corners to provide the perfect amount of light right where you need it.

Opal's indirect, niche accent lighting, offers more flexibility in your designs options allowing you to integrate deck lighting into any outdoor living space.
