

# APHRODITE & APHRODITE SS

Precision Engineered Extendable Path & Area Light

This small, two-tiered pagoda light offers a sleek, compact design for path or accent lighting.

Aphrodite is a durable, discreet fixture with an innovative design which allows you to modify and control the light pattern produced, to meet your lighting needs.

With two options for increasing the light intensity and spread, Aphrodite is the perfect combination of style and function, to accommodate any path lighting application.

- As your plant material grows, Aphrodite's telescopic stem allows you to adjust the height by 14" (from 19-33") with no additional tools required.
- Quickly increase or decrease the height of the lamp basket by threading the brass bushing up or down to control the light output and beamspread pattern.

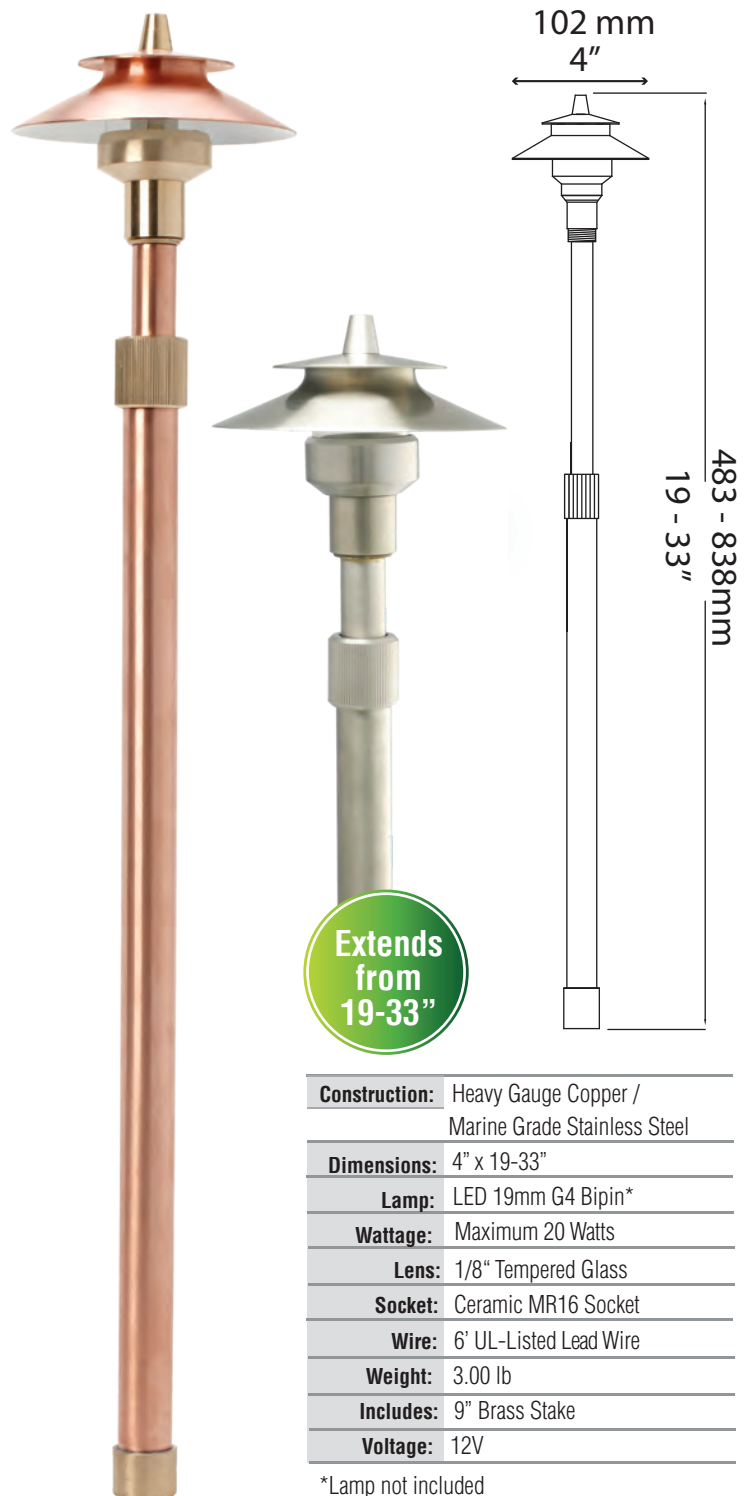

Aphrodite's clear glass lens offers superior 270° optics while protecting the lamp from moisture and debris.

Available in both copper and stainless steel, this fixture is ideal for lighting paths and illuminating small plant material in low planter beds, architecture, or around hardscape borders.
