

ADONIS & ADONIS SS

Precision Engineered Extendable Path & Area Light

This classic, two-tiered pagoda light offers a sleek design for path or accent lighting.

Use Adonis in lighting designs which require a versatile, ground-mounted path or accent light where a wide beamspread is required. With two options for increasing the light intensity and spread, Adonis is the perfect combination of style and function, to accommodate any path lighting application.

- As your plant material grows, Adonis' telescopic stem allows you to adjust the height by 14" (from 19-33") with no additional tools required.
- Quickly increase or decrease the height of the lamp basket by threading the brass bushing up or down to control the light output and beamspread pattern.

Adonis' clear glass lens protects the lamp from moisture and other debris, while providing 270 degrees of illumination. The reflective undercoating of the top hat extends the light output to 360 degrees.

Available in both copper and stainless steel, this fixture is ideal for traverse lighting and illuminating spreading plant material in planter beds, wide pathways, or around hardscape borders.
